

mobile-order

The restaurant OS that grows sales — with zero referral fees

Zero referral fees · Launch in 5 minutes · First month free.

Are platform commissions eating your sales?

Referral fees

You keep paying review sites — and the customer list never stays with you

No repeat visits

First-timers don't return, and there's no way to bring them back

Profit is invisible

You can't tell which dishes actually make money

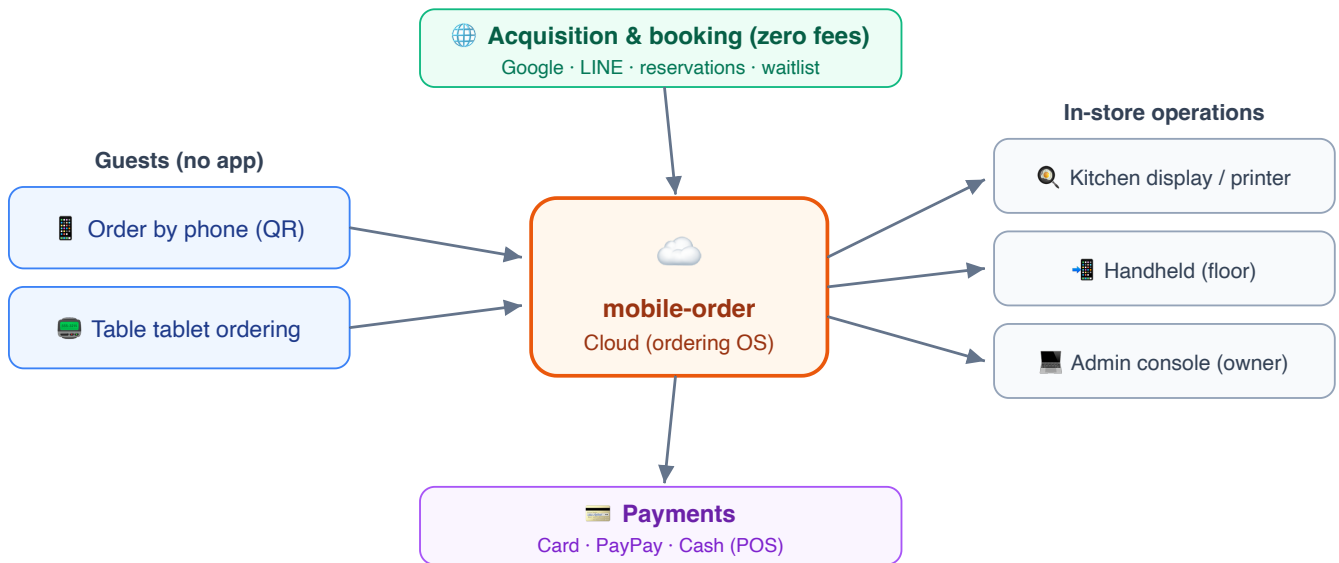

Acquisition → Prepay → Repeat → Profit, all in one

🌐 Acquire via your own Google · LINE · QR → **zero referral fees**

💳 Prepaid passes, subscriptions & e-gifts → **revenue upfront + new customers**

📊 An AI advisor turns cost x sales into **concrete profit actions**

System overview

Highlights

🚀 **Launch in 5 minutes** with 9 industry templates

🔍 Kitchen display + handheld for staff

🍽️ All-you-can-eat / drink plans

💳 **Passes / subscriptions** — prepaid revenue & repeat

📱 **QR & tablet ordering** — on the guest's phone or a table tablet · iPad/Android, no app, auto-updating

🌐 4 languages (ja/en/zh/ko) for inbound guests

📅 **Online reservations** + waitlist (seat & course types)

🎁 **e-gift tickets** — gift to a friend → new visits

drive

 **Win-back** for dormant guests + customer CRM

 **AI management advisor** — profit diagnosis from cost x sales

 **Purchasing / stocktake** — moving-average cost & loss visibility

 **Spend / turnover** — day x time heatmap, operating profit

 **HACCP hygiene checks** — the mandatory daily log, on your phone

 **Attendance / shifts** — demand-based, labor cost with premiums

 **Large-text easy ordering** for seniors & first-timers

 Cross-store management for chains
